"Build Stripe + Supabase subscription system"

For Developer Info only to validate other related Tasks

SYSTEM OVERVIEW

Stack

- Frontend (Lovable / Next.js later)
 - Backend: Supabase
 - Payments: Stripe
 - Webhooks: Supabase Edge Functions
-

1. STRIPE SETUP (Products + Prices)

Inside Stripe dashboard:

Create Products

1. Starter Plan

- Name: IDA Starter
- Price: \$0.00
- Billing: None

2. Pro Plan

- Name: IEP Pro
- Price: \$49/month
- Billing: Recurring

3. Business Plan

- Name: IEP Business
- Price: TBA
- Billing: Recurring

4. Enterprise Plan

- Name: IEP Enterprise
- Price: TBA Contract Proposal
- Billing: Fix Price

5. One time usage

- Name: IEP Starter
- Price: \$59.00
- Billing: One time charge

Save These IDs (IMPORTANT)

You'll need:

- price_pro_id
- price_business_id

2. SUPABASE DATABASE SCHEMA

A. Users Table (extend existing)

None

```
alter table users
add column if not exists stripe_customer_id text,
add column if not exists plan_type text default 'free',
add column if not exists subscription_status text,
add column if not exists current_period_end timestamp;
```

B. Subscriptions Table

None

```
create table subscriptions (
  id uuid primary key default gen_random_uuid(),
  user_id uuid references users(id),
  stripe_subscription_id text,
  stripe_price_id text,
  status text,
  current_period_end timestamp,
  created_at timestamp default now()
);
```

3. ROW LEVEL SECURITY (RLS)

None

```
alter table subscriptions enable row level security;

create policy "Users can view own subscriptions"
on subscriptions
for select
using (auth.uid() = user_id);
```

4. CREATE STRIPE CHECKOUT (Edge Function)

Supabase Edge Function: **create-checkout-session**

None

```
import Stripe from "stripe";

const stripe = new Stripe(Deno.env.get("STRIPE_SECRET_KEY")!, {
  apiVersion: "2023-10-16",
```

```
});

Deno.serve(async (req) => {
  const { priceId, userId, email } = await req.json();

  const session = await stripe.checkout.sessions.create({
    mode: "subscription",
    customer_email: email,
    line_items: [
      {
        price: priceId,
        quantity: 1,
      },
    ],
    success_url: "https://yourdomain.com/dashboard?success=true",
    cancel_url: "https://yourdomain.com/pricing",
    metadata: {
      user_id: userId,
    },
  });

  return new Response(JSON.stringify({ url: session.url }), {
    headers: { "Content-Type": "application/json" },
  });
});
```

5. FRONTEND (LOVABLE BUTTON ACTION)

Upgrade Button → Call Edge Function

```
None

const res = await fetch("/functions/v1/create-checkout-session", {
```

```

method: "POST",
body: JSON.stringify({
  priceId: "price_pro_id",
  userId: user.id,
  email: user.email,
}),
});

const data = await res.json();
window.location.href = data.url;

```

6. STRIPE WEBHOOK (CRITICAL)

Create another Edge Function:

stripe-webhook

None

```

import Stripe from "stripe";

const stripe = new Stripe(Deno.env.get("STRIPE_SECRET_KEY")!, {
  apiVersion: "2023-10-16",
});

Deno.serve(async (req) => {
  const sig = req.headers.get("stripe-signature")!;
  const body = await req.text();

  const event = stripe.webhooks.constructEvent(
    body,
    sig,
    Deno.env.get("STRIPE_WEBHOOK_SECRET")!
  );

```

```
switch (event.type) {
  case "checkout.session.completed":
    const session = event.data.object;

    const userId = session.metadata.user_id;

    await supabase
      .from("users")
      .update({
        plan_type: "pro",
        subscription_status: "active",
      })
      .eq("id", userId);

    break;

  case "invoice.payment_failed":
    // downgrade or flag
    break;

  case "customer.subscription.deleted":
    // downgrade to free
    break;
}

return new Response("ok");
});
```

7. FEATURE GATING (REAL MONEY LOGIC)

This is what actually enforces payment.

Example: Collaborators Limit

None

```
if (user.plan_type === "free" && collaborators.length >= 1) {  
  showUpgradeModal();  
}
```

Example: Analytics Lock

None

```
if (user.plan_type === "free") {  
  return <BlurredAnalytics />;  
}
```

Example: AI Workflow

None

```
if (user.plan_type !== "pro" && user.plan_type !== "business") {  
  showUpgradeModal();  
}
```

8. SUBSCRIPTION SYNC (IMPORTANT)

On login:

None

```
const { data } = await supabase  
  .from("users")  
  .select("plan_type, subscription_status")  
  .eq("id", user.id)  
  .single();
```

9. PRODUCTION CHECKLIST

Before going live:

- ✓ Stripe live keys
 - ✓ Webhook endpoint added in Stripe
 - ✓ Supabase env variables set
 - ✓ HTTPS domain for success/cancel URLs
 - ✓ Test full flow (upgrade → webhook → unlock feature)
-

10. OPTIONAL (HIGHLY RECOMMENDED)

Add Customer Portal (Stripe Hosted)

Let users:

- Cancel subscription
- Update payment
- Change plans

None

```
const portalSession = await stripe.billingPortal.sessions.create({
  customer: customerId,
  return_url: "https://yourdomain.com/dashboard",
});
```

What You Now Have

With this setup:

- ✓ Users can upgrade seamlessly
- ✓ Payments are automated
- ✓ Features unlock instantly

- ✓ Downgrades handled via webhook
 - ✓ System scales cleanly
-
